EXECUTIVE SUMMARY

Staff Data Engineer and Data Platform Architect with 15+ years of experience designing, scaling, and operating production cloud-native data platforms across high-growth domains (Cybersecurity, MarTech, Fintech, Gaming). Expert in Snowflake architectures, Python, modern ELT (dbt, Airflow), and identity resolution engines. Proven track record of building reusable, low-maintenance ingestion frameworks that drastically slash development cycles, implementing rigorous DataOps/Data Quality tooling, and bridging the gap between deep infrastructure engineering and commercial product/analytics teams.

CORE EXPERTISE

- **Architecture:** Modern ELT/ETL, Data Platform Design, Data Contracts, Governance & Observability
- **Snowflake Mastery:** Snowpark, Streams & Tasks, MERGE Optimization, Cost Optimization
- **Domain Specialization:** Identity Resolution, MarTech Data Ecosystems, Cybersecurity Telemetry
- **Leadership:** Cross-functional Technical Strategy, Team Management (up to 8), Mentoring & Training

TECHNICAL SKILLS

- **Languages:** Python, SQL, Bash, JavaScript
- **Cloud Platforms & Data Warehouses:** Snowflake, Google Cloud Platform (BigQuery), AWS (AuroraDB)
- **Data Engineering & Ops:** Apache Airflow, dbt, Airbyte, Fivetran, Gitlab/GitHub Actions, Docker, Kubernetes
- **Databases & Storage:** PostgreSQL, MongoDB Atlas, Oracle, SQL Server, DB2
- **MarTech & Analytics:** Segment, Braze, Mixpanel, Looker, Datadog, Tableau, Meta/Google Ads

SELECTED ARCHITECTURE HIGHLIGHTS

- **Customer Identity Resolution Platform:** Designed and deployed a deterministic identity resolution pipeline using optimized Snowflake MERGE architectures. Unified siloed CRM, product event, and marketing data into a high-performance canonical customer model.
- **Marketing Data Platform Framework:** Architected a boilerplate ingestion framework integrating global SaaS APIs and advertising platforms into Snowflake, featuring automated schema validation and isolated CI/CD workflows.
- **Enterprise Data Platform Modernization:** Led migration initiatives from legacy databases and ETL environments into cloud-native architectures, improving scalability, reliability, and analytical capabilities while maintaining business continuity.

PROFESSIONAL EXPERIENCE

CookUnity — MarTech Data Engineer | Feb 2025 – Present | Remote (New York, USA)

Scope: Own architectural evolution of the core Marketing Data Platform powering Growth, Analytics, and Engagement teams.

- Architected and maintained 70+ production pipelines, ingestion structures, and identity mapping workflows into Snowflake.
- Designed and shipped a reusable core ingestion framework across 20+ external integrations, slashing new pipeline development time by 60%.
- Implemented end-to-end operational monitoring using Datadog and automated Slack alerting, reducing mean-time-to-detection (MTTD) from hours to under 3 minutes.
- Partnered closely with VP of Marketing and Engineering leads to align data platform capabilities with cross-functional product roadmaps.

Stack: Snowflake, Python, SQL, Airflow, Datadog, Braze, Segment, Mixpanel, Meta/Google Ads

Eclypsium — Senior Staff Data Engineer | Oct 2023 – Feb 2025 | Remote (Oregon, USA)

Scope: Chaired architectural strategy for the Cybersecurity Analytics Platform, enabling petabyte-scale security telemetry analysis.

- Engineered high-throughput batch and event pipelines processing complex security telemetry data into BigQuery.
- Formulated modular, reusable ingestion patterns that accelerated third-party threat intelligence onboarding.
- Developed Python-based threat intelligence scraping frameworks using Scrapy, standardizing unstructured datasets into clean, analytical target schemas.

Stack: GCP, BigQuery, Apache Airflow, Kubernetes, Docker, Airbyte, PostgreSQL, MongoDB Atlas, Looker, Python

VettedBiz / Visa Franchise — Data Analytics Manager | May 2022 – Oct 2023 | Remote (Miami, USA)

Scope: Headed the combined Data Engineering and BI Analytics organization tasked with enterprise reporting and data products.

- Managed and mentored a high-performing cross-functional team of 8 engineers and data analysts.
- Overhauled legacy relational data structures into highly optimized dimensional models hosted on AWS.
- Introduced enterprise data governance blueprints and automated validation testing to boost executive data trust metrics.

Stack: AWS, AuroraDB, MariaDB, Python, Pentaho Data Integration, Jira, Confluence

Big Fish Games — Senior Data Engineer | Mar 2021 – May 2022 | Remote (Seattle, USA)

Scope: Drove technical engineering for planetary-scale gameplay analytics platforms.

- Built and optimized high-volume Apache Airflow DAGs streaming large-scale mobile gaming telemetry.
- Authored Python microservices and GCP Cloud Functions to scale asynchronous event payload processing.
- Created underlying data models powering enterprise-wide Looker dashboards and critical KPI monitoring.

Stack: Snowflake, Python, Airflow, GCP, Google Cloud Functions, SQL, Looker

Banco Credicoop — Pentaho Integration Lead | Aug 2015 – Feb 2021 | Hybrid (Buenos Aires, Argentina)

- Directed a technical team of 5 ETL developers delivering mission-critical integrations under strict regulatory frameworks.
- Engineered secure financial data exchange fabrics linking internal bank legacy systems with federal networks.
- Optimized query and indexing schemas across deep Oracle and DB2 instances, shaving hours off critical batch processes.

Stack: Pentaho Data Integration, Oracle, DB2, Linux, Bash

Assert Solutions — Project Manager / Lead BI Consultant | Nov 2010 – May 2015 | On-Site

- Managed and delivered complex BI and Big Data architecture consulting initiatives across telecom and public sectors in LATAM.
- Conducted technical engineering bootcamps for enterprise teams across Ecuador, Colombia, and Chile.

| EARLIER EXPERIENCE

- Datalytics - Business Intelligence Architect
- SBI Technology - R&D; Engineer
- Ingrocom / Freelance - Software Developer

| EDUCATION & CREDENTIALS

- **Bachelor of Science (B.S.) in Information Systems Engineering:** Universidad Tecnológica Nacional (2001 – 2006)
- **Languages:** Spanish (Native), English (C1 - Advanced Professional Proficiency)
